Project Brief : A compsite building development in the heart of Tsimshatsui

Colt Smoke Control System

No.8 Hau Fook Street is the heart of the prosperous shopping and dining place in Tsimshatsui. The project is a redevelopment of the site to a new composite building consisting restaurants and shopping outlets to cater the locals and tourist.

The 23 storeys building constructed with a prestigious curtain walling facade facing the main street with the total gross area of approximate 40,000 square ft.

FAS provided 100 units of special fire rated Kameleon casement type smoke release ventilators fiited along both stairwell of each storey to protect the means of escape, free from external fire hazard from adjacent buildings and provide smoke ventilation due to the internal fire hazard.
